

Safe2Say and the Privacy and Responsible Information Sharing Act 2024 (WA)

Whole-of-Government Privacy and Information Sharing

Overview

Safe2Say is an anonymous reporting platform that supports government agencies in receiving and acting on information relating to crime, misconduct, and community safety.

It is designed using a privacy-by-design approach, aligning with the Privacy and Responsible Information Sharing Act 2024 (WA) and the Information Privacy Principles.

Privacy by Design

Safe2Say does not rely on collecting personal information to operate.

Instead, it is designed to:

- Minimise the creation and collection of personal information
- Enable anonymous reporting by default
- Protect information through strong technical and organisational controls

Anonymity

All reports are submitted through the Tor network, reducing traceability.

Safe2Say:

- Does not require users to identify themselves
- Does not require account creation
- Does not have visibility of the reporter's originating IP address

Reporters may choose to provide contact details voluntarily.

Secure Information Handling

- Secure hosting and encryption
- Regular penetration testing
- Alignment with ISO 27001

Access to reports is restricted to designated personnel within the receiving agency.

Safe2Say personnel do not access report content as part of normal operations.

Responsible Information Sharing

Information is:

- Provided only to authorised agencies
- Used for purposes such as investigation, compliance, and public safety
- Shared in accordance with applicable laws and protocols

Only information necessary for these purposes is made available.

Supporting Government Agencies

Safe2Say provides:

- A secure and compliant reporting channel
- Structured and auditable information flows
- Reduced reliance on informal or insecure reporting pathways

Why This Matters for Government Agencies

Safe2Say enables people to report information safely and anonymously.

This leads to:

- Increased reporting
- Better intelligence
- Improved outcomes for government agencies

Summary

Safe2Say is designed to align with the Information Privacy Principles under the PRIS Act while enabling the secure flow of critical information.
